

## Seminare

Institut für Genetik, Zülpicher Str. 47, Seminarraum 4.OG

Freitags, 12:15

*Gäste sind herzlich willkommen!*

30.1.2009	Günter Plickert	<b>Mechansims of axial patterning in a basal metazoan</b>
17.4.2009	Peter Huijser	<b>Complex roles of SBP-box transcription factors in <i>Arabidopsis</i> sexual reproduction</b>
8.5.2009	Matthias Hammerschmidt	<b>Diverse roles of bone morphogenetic protein during early Zebrafish development</b>
15.5.2009	Martin Hülskamp	<b>Steps towards theoretical modelling trichome patterning in <i>Arabidopsis</i></b>
26.6.2009	Klaus Theres	<b>Control of shoot branching in tomato and <i>Arabidopsis</i></b>
10.7.2009	Ute Höcker	<b>Light-controlled plant growth and development</b>
24.7.2009	Wim Soppe	<b>The molecular mechanisms of seed dormancy in <i>Arabidopsis</i></b>
