

Contribution à la situation sociolinguistique anufo-gangam

Mimboabe Bakpa & Marie-Laure B. Kozi

University of Bayreuth - Germany

This study aims to show, through the level of bilingualism of gangam speakers, the influence of anufo on gangam dialects, an influence that led gangam dialects in a recession facing their torturer. The article underlines the reasons (languages contact and political choice of cultural manifestations) of this situation and make proposals that could help avoid a situation of "glottophagie".
