LEXEIS FROM THE SCHOLIA MINORA IN HOMERUM

aus: Zeitschrift für Papyrologie und Epigraphik 124 (1999) 25–52

© Dr. Rudolf Habelt GmbH, Bonn

LEXEIS FROM THE SCHOLIA MINORA IN HOMERUM*

The following alphabetical list of the *lexeis* from the *scholia minora in Homerum* is, I think, for the most part self-explanatory¹. But a word of introductory comment is perhaps called for.

The main object of the exercise has been to make life easier for those who turn to the *scholia minora in Homerum* in their quest for *comparanda*, *loci similes*, *testimonia* or the like². It should now be possible at a glance to discover what Homeric words and expressions are explained in the published texts belonging to this class and where.

In all but one case³ I have confined myself to published texts. The items catalogued by Lucia M. Raffaelli in her handy *Repertorio*⁴ have all been taken into account, with the exception of POxy inv. 44 5B.61/G(4-6)a (Raffaelli 007), POxy inv. 46 5B.51/E(4-5)a (Raffaelli 008) and PSorbonne inv. 2088 (Raffaelli 022), still awaiting publication, and PBerol inv. 9960 (Raffaelli 029), the now missing PVindob (Raffaelli 032) and PBerol inv. 10510 (Raffaelli 052), which may or may not in fact be *scholia minora*. In addition to these, I have also included editions appearing since⁵ and added some marginal and interlinear material⁶. No doubt in coming years many new papyri with *scholia minora in Homerum* will see the light. I shall be consulting these as they appear, incorporating their *lexeis* and constantly keeping this list up to date⁷.

Since the actual *lexeis* are on more than one occasion misspelt or (badly) damaged or lost altogether or, in the case of the interlinear and marginal glosses, need to be supplied, it seemed a sensible procedure, or at least a consistent one, to take them *all over* from a single standard edition of the Homeric poems. Van Thiel's recent *Odyssey* and even more recent *Iliad* (abbreviated to "T" in my list), based conservatively as they are on the medieval vulgate, appeared the least likely to diverge from the

* My thanks to Guido Bastianini, Michael Haslam, Gabriella Messeri and Cornelia Römer for much sound advice and friendly encouragement at various stages in the preparation of this list. The work, generously funded by the British Academy, has been undertaken as a preliminary step towards the collection of testimonia for the new edition of the *Homeric Lexicon* of Apollonius Sophista, on which I am collaborating with Michael Haslam.

¹ On pp. 33–40 of the fourth and final part of his epoch-making article "Scholia Minora zu Homer" (*ZPE* 12 [1973]), A. Henrichs provided an index of the "Lemmata" glossed in his editions. This has been the inspiration and model behind the present compilation.

² I think in particular of editors of the *scholia minora* themselves and of other lexicographical works. But even modern commentators of Homer may perhaps find it of interest to learn what the ancients thought his words meant.

³ Professor Bastianini has kindly allowed me to incorporate the *lexeis* from TMilVogliano inv. 8 in advance of publication.

⁴ Lucia M. Raffaelli, *Repertorio dei papiri contenenti scholia minora in Homerum*, in *Ricerche di filologia classica II*, Biblioteca di Studi Antichi 45, Pisa, Giardini, 1984, pp. 139–77. A second edition should now be approaching completion.

⁵ PCairo J.E. 45612 (ad Il. 1.43–5, 48–50), PYale 125 (ad Il. 1.66–74), PBerol inv. 21306 (ad Il. 1.97–9), PYale 126 (ad Il. 1.189–223), TMilVogliano inv. 8 (ad Il. 1.405–36), PYale 127 (ad Il. 5.726–78), PMich inv. 3723b (ad Il. 22.184–256) and POxy 3833 (ad Od. 17.455–18.27).

⁶ POxy 445 (ad Il. 6.128), PAnt 158 (ad Il. 9.194), POxy 770 (ad Il. 13.374), POxy 685 (ad Il. 17.731), PBerol inv. 11761 (ad Il. 23.403), PBritLibr inv. 271 (ad Od. 3.430, 438, 444, 452, 486), PBerol inv. 21111 (ad Od. 4.465, 466, 493), PBerol inv. 11759 (ad Od. 15.534) and POxy 1820 (ad Od. 18.64, 190). The jottings in these papyri, together with the *marginalia* in POxy 1397 (ad Od. 18.67, 70) and PAnt 174 (ad Od. 22.188), already listed by Raffaelli (Od. 009 and 010 respectively), and in other annotated Homeric papyri, are conveniently collected and edited by Kathleen McNamee in a recent contribution: *Annotated Papyri of Homer, Papiri letterari greci e latini*, a cura di Mario Capasso, Papyrologica Lupiensia 1, Galatina, Congedo Editore, 1992, 13–51.

⁷ For various reasons, I have unfortunately been unable to make use of the fragments of *scholia minora* edited in recent dissertations by G. W. Schwendner (*Literary and Non-Literary Papyri from the University of Michigan Collection*, Diss. Ann Arbor, 1988) and J. Spooner (*Homeric and Documentary Papyri from Oxyrhynchus*, Diss. London 1991).

lexeis, and for this reason have been adopted⁸. Where, however, there do occur discrepancies between his text and that of the papyri, these have been noticed parenthetically. “Minor” differences, such as those involving elision or the v-movable⁹, have been passed over in silence, in keeping with the principal aim of the list, which is to guide the user to the glosses on Homeric words and not to provide detailed and systematic collation.

As for the single entries themselves, little needs to be said. They consist of the *lexis*, embracing one or more words from the Homeric text, followed by a specific reference to the papyrus where it is singled out for explanation and an indication of the passage in question¹⁰. In those cases in which the same *lexis* from the same verse is explained in two or more papyri, the references have been grouped together in one entry in the interests of space. A question mark warns the user of unresolved or unresolvable uncertainty surrounding some of the information provided. For the various declined and conjugated forms of the same word, compounds and words occurring in *lexeis* composed of entire expressions no system of cross-references has been provided. But with a little effort and patience it should still be easy to locate what one is after. In fact, it would probably take less time to scan the whole index from beginning to end than to work one’s way through just a few editions of *scholia minora*.

The references to each and every one of the papyri are tied to a list of editions used, and this in turn to a bibliography, which immediately follows. The abbreviations employed are the ones in current use. Raffaelli’s and Sutton’s¹¹ numbers are given within parentheses at the end of each item in the list of editions.

⁸ Homeri Odyssea, Recognovit Helmut van Thiel, Bibliotheca Weidmanniana I, Hildesheim–Zürich–New York, Olms, 1991; Homeri Ilias, Recognovit Helmut van Thiel, Bibliotheca Weidmanniana II, Hildesheim–Zürich–New York, Olms, 1996. For a brief comparison of a number of the more widely-used modern editions of Homer and an evaluation of van Thiel’s texts, cf. Michael Haslam, Homeric Papyri and Transmission of the Text, in *A New Companion to Homer*, Leiden–New York–Köln, Brill, 1997, 99–100. The edition of the *Iliad* has now been given a balanced review by M. L. West in *CR* 48 (1998): 1–2.

⁹ One of the consequences of the fragmentation of the Homeric text into a series of separate lexical items (typical of the *scholia minora*) seems to be that the words to be explained are most frequently restored to their full, unelided form. Where, on the other hand, no elements are skipped (not even the commonest of words) and elision respected, it may be more appropriate to speak of paraphrase than of *scholia minora*, whatever the mode of presentation adopted may be. A case in point is P^Vindob inv. Gr. 26221 (Raffaelli 021). Here the verses are broken up into their components and these set on separate lines, but coverage is complete and words are elided (cf. recto, 3 and verso, 2 and 6).

¹⁰ I had contemplated replacing these somewhat lengthy and cumbersome references with simpler ones such as p1, p2 etc., but then thought that the last thing people want at this point is yet another system of numbers to cope with. Besides, references to papyrological collections have the distinct advantage of being both direct and unambiguous.

¹¹ Dana F. Sutton, *Homer and the Papyri*, consultable on the Web at <http://eee.uci.edu/~papyri>.
