

Selee (Santrokofi) noun classes

Yvonne Agbetsoamedo

University of Ghana - Ghana

In this presentation, I investigate the semantics for the grouping of nouns into classes and the agreement associated with them in the NP structure.

First, I present the markers of the Noun Classes and examine the semantics of each class. I show that there is a singular and plural pair for nouns except those that refer to liquids and mass nouns.

Selee is a Ghana Togo Mountain (GTM) language spoken in the Volta Region of Ghana by 4500 people.
